EXP 2

Design a User Interface Prototype for a Mobile Station Using Figma

Aim:

To design a user interface prototype for a mobile station using Figma, considering connectivity, accessibility, and user convenience.

PROCEDURE

1. Open Figma and create a new design file.

2. Create a mobile screen frame using a suitable device size.

3. Design the home screen with essential features such as calls, contacts, messages, and settings.

4. Add connectivity options such as Wi-Fi, Bluetooth, mobile data, and network signal indicators.

5. Include convenience features such as a battery indicator, quick settings, search bar, and notification panel.

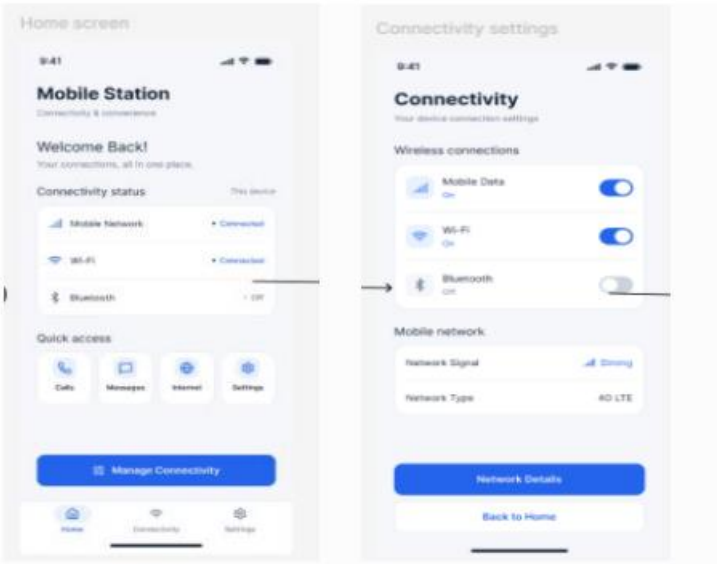

6. Use appropriate icons, colors, typography, and layouts to improve usability.

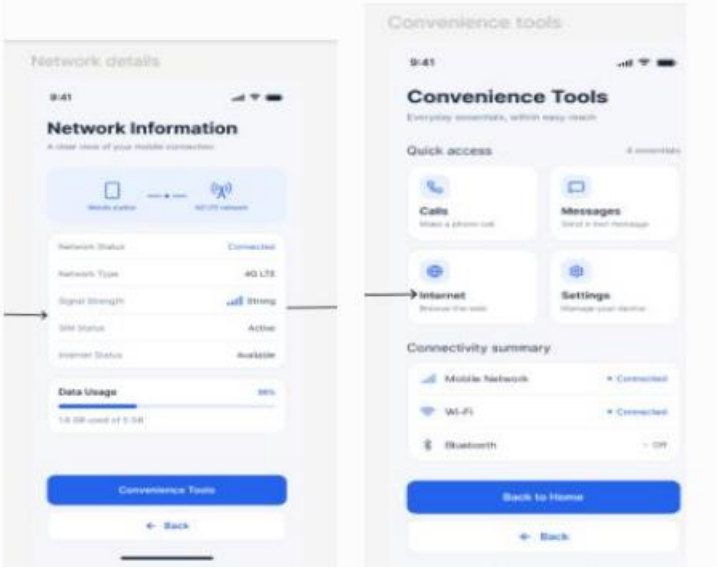

7. Create additional screens for calling, messaging, and network settings.

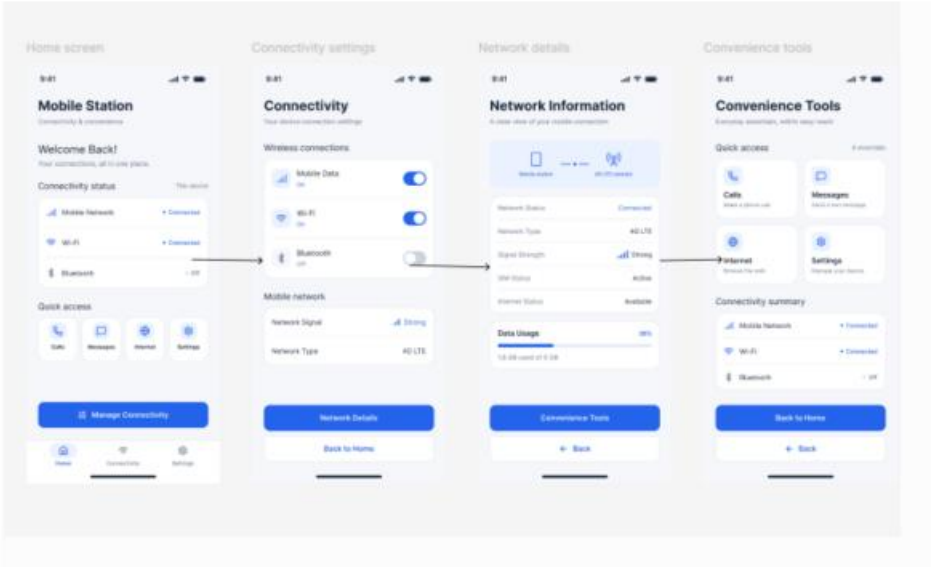

8. Connect the screens using Figma's Prototype mode to simulate user interactions.

9. Preview the prototype and verify that navigation and connectivity controls are easy to use.

RESULT:

Thus, a mobile station user interface prototype was designed using Figma, incorporating connectivity features and convenient navigation for an improved user experience.
