5. Design a wireframe for a mobile application that incorporates localization features using Figma.

Aim

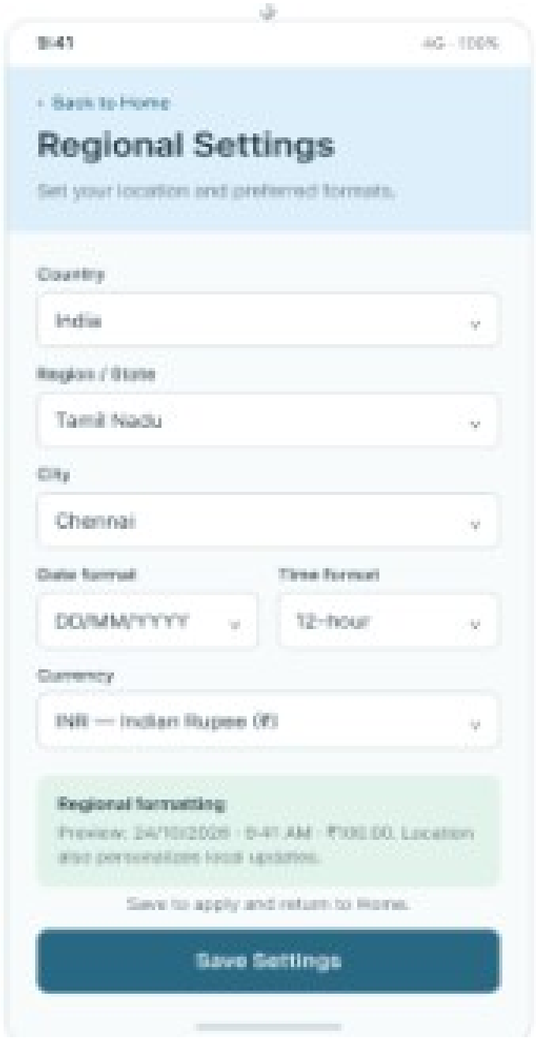

To design a wireframe for a mobile application that incorporates localization features using Figma.

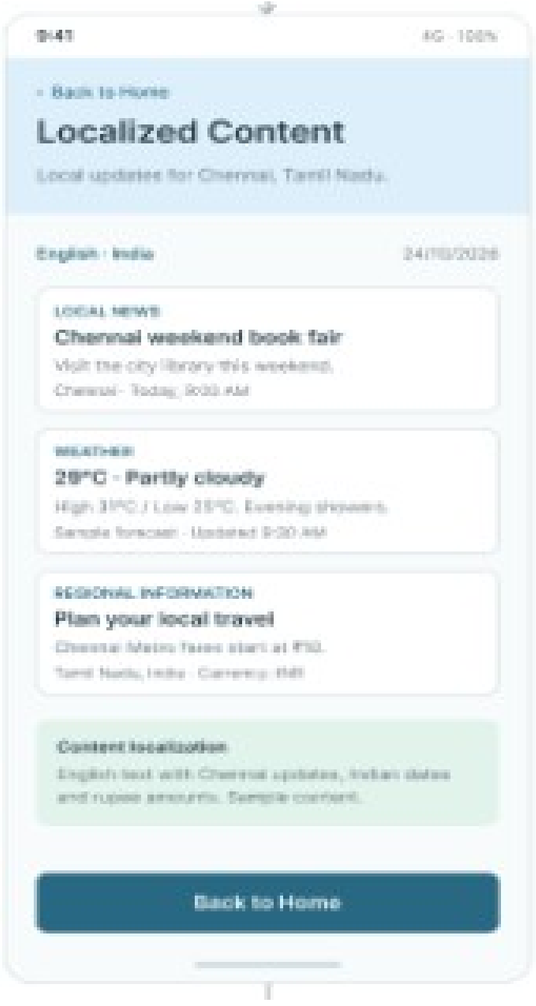

Procedure

1. Open Figma and enter the prompt to generate the mobile app wireframe.
2. Create four screens: Home Screen, Language Selection, Regional Settings, and Localized Content.
3. Add language options such as English, Tamil, Hindi, and Telugu.
4. Include regional settings for country, date, time, and currency formats.
5. Connect the screens using navigation arrows and arrange them on one page.
6. Review the wireframe and make sure all elements are clear and readable.
